

MiniMines CRM

Complete User Manual & Automation Documentation

1. Introduction

Welcome to the MiniMines CRM. This system manages the end-to-end Business Development (BD) pipeline from raw leads to fulfilled Sales Orders. The platform implements Soft Row-Level Security (RLS) to ensure users only see data relevant to their specific role.

2. User Roles

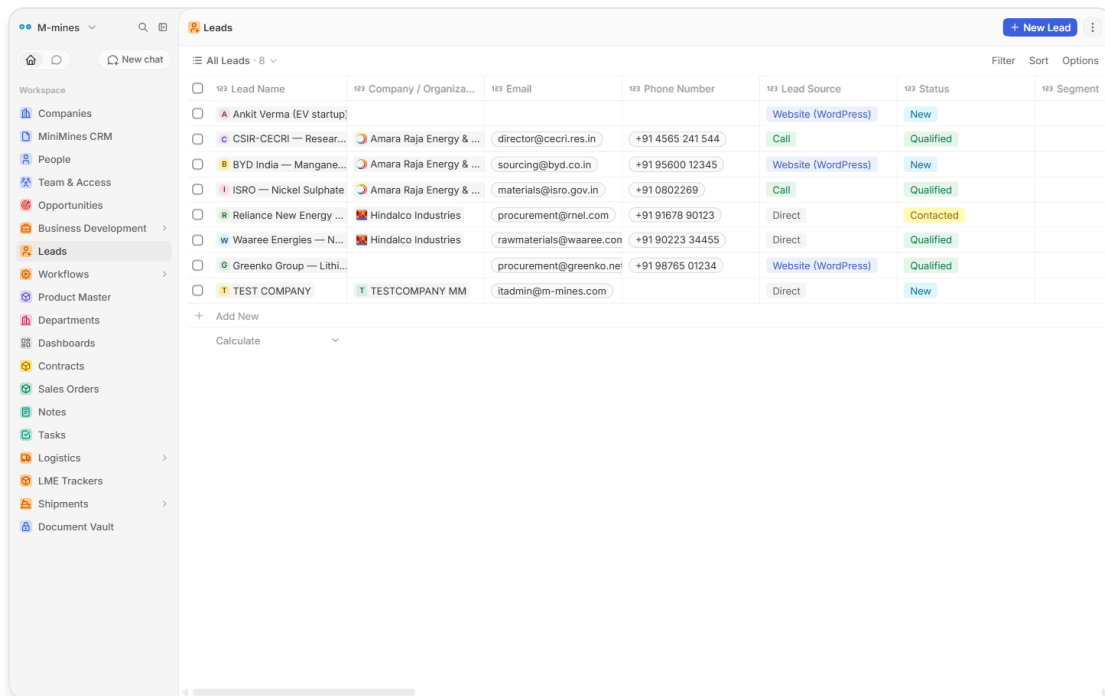

- **BD Associate** - Frontline staff handling initial calls and lead qualification. Sees only their own assigned leads.
- **BD Manager** - Oversees a team of associates, monitors lead conversion, and reviews draft quotations. Sees data for their entire team cluster.
- **HOD (Head of Dept)** - Final authority on pricing and operations. Has a 100% global view of all data and analytics.

3. Workflow: Lead Management

(Associate)

The Lead Management Dashboard is where daily prospecting occurs.

- 1 Log into the CRM and navigate to the **Leads Dashboard**. You will automatically see your assigned queue.

- 2 Update the **Status** of a Lead (e.g., to "Contacted" or "Qualified").

4. Workflow: Opportunity Pipeline (Associate / Manager)

Once a Lead is qualified, it is converted into an Opportunity. This initiates active negotiations.

- 1 Navigate to the **Opportunity Pipeline** to view the Kanban board.

- 2 Drag the opportunity through the stages: *Requirements* → *Negotiation*.
- 3 Click "Create Quotation" to draft a proposed rate.

5. Workflow: Quotation Approvals (HOD)

The Quotation Dashboard manages pricing authority and Sales Order generation.

- 1 Navigate to the **Quotation Dashboard**. Drafts submitted by Managers will appear here.
